Can you say that after the meeting you know more about the region of Central Croatia?

What is the most interesting thing you learned during the meeting?

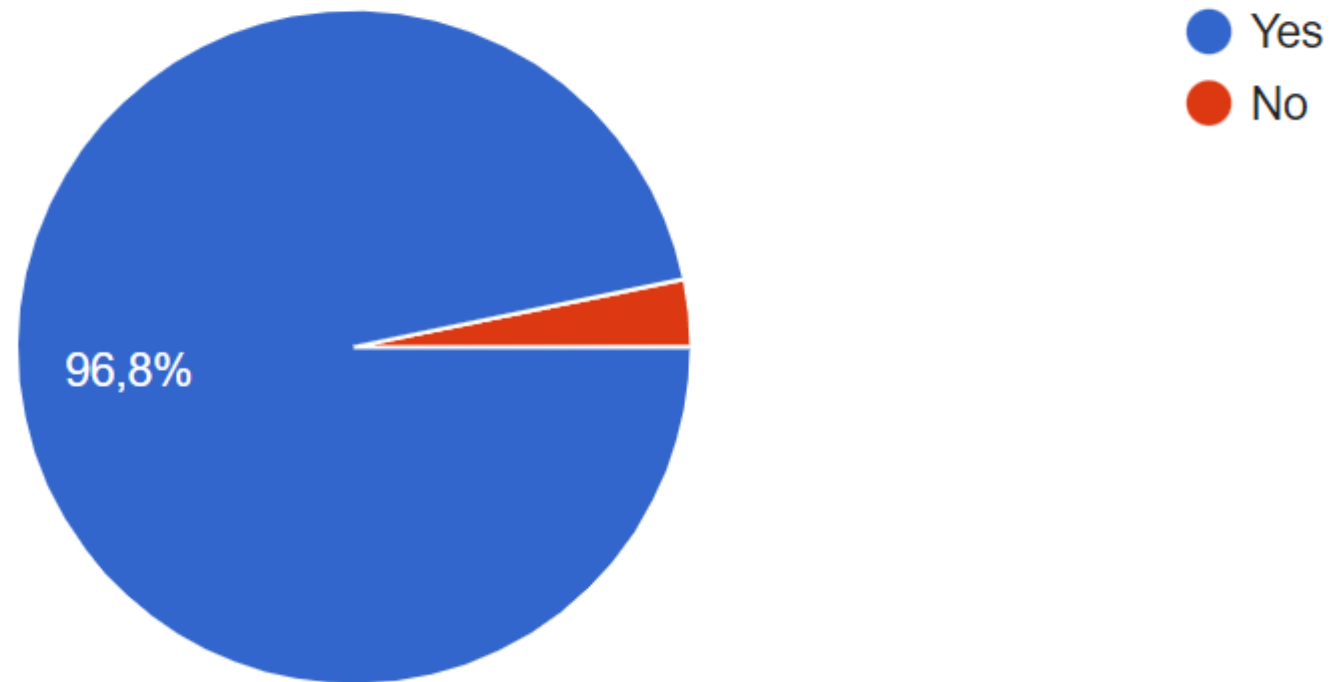

- The cultural differences between the active countries in the project.
- Everything has its first time for example. Eating other food, learning about other country, and visits to other places.
- I learned a lot from other students.
- Making bread.
- How to communicate with people who don't speak English very well.
- Other people's habits, hearing about the way of living in other partners' countries, meeting new people and understanding their way of thinking.

- Rural life in the past and baking cookies.
- The most interesting thing I learned about was the history of chocolate.
- One of the most interesting things I learned was the customs of each one, their traditional foods and that despite everyone having their differences and each in their own language, we managed to make friends.
- How other students from partner countries are really kind.
- Learning about Croatia and the monuments.
- Culture of other countries.
- Everything was interesting, but probably traditions.

- They have the shortest tram in the world.
- That everything is so different.
- Getting to know other people.
- New knowledge about other people and their traditions.
- Stories of places we have been to.
- What interested me the most was the Croatian culture.
- That friendship means all, without friendship you have nothing to offer to the world and more important to yourself. Because when you make friends that thing develops you in many ways possible like English speaking, socialization that develops the brain and the personality of that person. In the end, for me friendships are all.
